```

501 Receiving radio frames in a receiver of a user equipment

502 Decoding a physical layer control information from a radio frame at the user equipment

503 Identifying transport block sizes of the radio frame in the user equipment

504 Is there transport blocks in the radio frame that are not directed to the UE?

Yes

End processing these transport blocks 505

Others

506 Deinterleaving

507 Rate matching

508 Error control decoding

509 Calculating a CRC checksum

510 Transferring the data to a MAC-layer for further processing
